'ICTFOOTPRINT.eu' - SMEs/startups who care about energy efficiency

The [ICTFOOTPRINT.eu](http://ictfootprint.eu) is a new Horizon 2020 funded CSA project entitled 'European Framework Initiative for Energy & Environmental Efficiency in the ICT Sector'.

Coordinated by Trust-IT Services, the project aims to raise awareness on metrics, methodologies and best practices in measuring the energy and environmental efficiency of the ICT sector. In particular, it aims to address the challenges SMEs face in wanting to adopt sustainable and energy efficient methodologies if mechanisms were easier.

ICTFOOTPRINT.eu would like to invite SMEs/startups to contribute to the above aim by attending a one-day meeting at the European Commission's premises in Brussels on the **14th April 2016**.

Attendees will gain knowledge & share experiences around ICT energy efficiency and also tap into a range of free promotional/consultancy services offered by the project such as:

- Free updated information on how your SME can make cost savings through ICT-related expenditures;
- Free consultancy on adopting the right methodologies and reduce your carbon footprint;
- Presence on the website and social media platforms through your best practises if you would like to showcase any green initiatives you may have;
- Contribute & showcase your company in the project's newsletters and other outreach activities

If you are interested in attending the above meeting, please email your expression of interest to contact@ictfootprint.eu and do reference this source.
